Objective

Full Stack Developer with 4+ years of experience building scalable web and mobile applications using Java, Spring Boot, React.js, Vue.js, and Flutter. Proven ability to design high-performance systems, optimize user experience, and deploy applications on AWS. Experienced in leading frontend initiatives, improving code quality, and collaborating in agile teams to deliver production-ready solutions.

Skills

- Frontend: React.js, Vue.js (Vue3), TypeScript, JavaScript (ES6+), HTML5, CSS3
- Backend: Java, Spring Boot, Node.js, Express.js
- Mobile: Flutter, Dart
- Database: MongoDB
- Cloud & DevOps: AWS (Lightsail, S3), CI/CD, Git, GitHub
- Other: REST APIs, Agile Development, Code Reviews

Experience

Developer

10/2021 – Present

Simkraft Digital Tech LLP

LowerParel

- Developed and maintained scalable web and mobile applications using **React.js, Vue.js, Flutter, and Java-based backend services**
- Designed and implemented **responsive, user-centric interfaces** using HTML5, CSS3, and JavaScript (ES6+)
- Integrated and consumed **RESTful APIs**, enabling seamless communication between frontend and backend systems
- Managed application data using databases, ensuring performance, reliability, and data integrity
- Deployed applications on **AWS Lightsail**, configuring instances and managing backend hosting
- Utilized **AWS S3** for static asset storage and optimized content delivery
- Collaborated with cross-functional teams in agile environments to deliver high-quality features
- Conducted code reviews and enforced coding standards to improve code quality
- Used **Git and GitHub** for version control, branching, and team collaboration

Projects

StyleRent APP

Description: StyleRent is a Flutter application designed to provide a seamless platform for users to Rent fashion items. This app aims to connect fashion enthusiasts with a wide range of clothing and accessories, promoting sustainable fashion by enabling the rental of items instead of purchase.

Technologies Used: Flutter, Dart, RESTful APIs, JSON, Git

Sports Management Application

Description: Developed a React-based Sports Management Application for handling state-level sports events across multiple age groups. Implemented features for athlete registration, event scheduling, and result tracking using reusable components and REST API integration. Ensured efficient state management and a responsive user interface for seamless user experience.

Technologies Used: React.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, REST APIs, Axios/Fetch, Redux/Context API, Git

Flutter NFC APP

Description: A Flutter App enabling users to effortlessly create and customize digital business cards and share them with others using NFC technology.

Technologies Used: Flutter, Java, Dart

FTP Automation Website

Description: The FTP Automation Website is designed to streamline file transfer processes, providing users with an intuitive interface to manage FTP operations efficiently. The frontend, built using Vue3, ensures a responsive and user-friendly experience.

Technologies Used: Vue3, HTML5, CSS3, TypeScript

Creato

Description: Frontend Team Lead for Creato, a web platform for managing client deliverables and creative workflows; implemented Vue.js (TypeScript), TUS file uploads, Calendly integration, UI development, and supported Java deployment.

Technologies Used: Vue3, HTML5, CSS3, TypeScript, CI/CD
